Portofolio: <https://zhillanportofolio.vercel.app/>

I am a Web Developer with a strong focus on building responsive and user-friendly websites with attractive visual design. I specialize in programming languages such as Python, HTML, and CSS, and I have hands-on experience with modern frameworks like React.js and Tailwind CSS.

I'm able to work independently or in a team, managing projects from start to finish while ensuring everything runs smoothly and meets visual and functional expectations. I prioritize writing clean, maintainable code, making it easier to scale and improve over time.

When working with clients, I strive to fully understand their vision and bring it to life, considering both technical and functional aspects. I also continually explore new technologies, consistently hone my skills, and readily embrace challenges with effective problem-solving, attention to detail, and strong adaptability.
